Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Claim Objections*

Claim 46 is objected to because of the following informalities: claim 46 is substantially the same as claim 37. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 30-31, 37-39 and 41-42 are rejected under 35 U.S.C. 102(e) as being anticipated by DOORLY et al. (6,554,856).

As to claims 30-31, 37-39 and 41-42, DOORLY (Fig. 2, 4-5, col. 3, lines 1-12, for example) shows stent interior layer 1-2 (flexible joined together as a single unified unit)/8 (hook or barb shape) having a shape served as means to secure stent interior layer 1-2/8 to body lumen 5, stent exterior layer 3/9.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 32-36, 43-45 and 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over NASH et al. (6,030,395).

As to claims 32-36 and 44-45, DOORLY discloses substantially all main structural limitations of the claimed invention, except for various materials for making the stent comprising a material such as a biologically inert material/shape-memory material/biologically active material/resorbable material/radioactive material/braided material. The materials as claimed are well known in the art for making a stent. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make DOORLY stent of a material as claimed for these material are well known materials suitable for making a stent.

As to claims 43 and 48, DOORLY discloses substantially all main structural limitations of the claimed invention, except for the stent is secured by an adhesive or by sutures. Adhesive and sutures are well known materials for securing a stent to a blood vessel. It would have been obvious to one of ordinary skill in the art at the time the invention was made to secure DOORLY stent to a blood vessel by adhesive or sutures for these material are well known materials suitable for securing the stent to a blood vessel.

***Response to Arguments***

Applicant's arguments with respect to the rejected claims in the previous Office action have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3731

**Conclusion**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
